EDUCATION

FEU Alabang **Muntinlupa City**
Bachelor of Science in Information Technology

INDUSTRY EXPERIENCE

Setup Phils, Inc **Remote**
Frontend Developer March 2023 – Present

- Led migration of legacy WordPress sites to React and Next.js (TypeScript), improving GTmetrix performance from Grade C to A and increasing page visits and successful registrations by 90%+.
- Led a team of 4 developers and owned frontend architecture, technical decisions, UI structure, and documentation.
- Developed end-to-end frontend features using React, Next.js, TypeScript, React Query, Tailwind CSS, shadcn/ui, Bootstrap, and AG Grid, from requirements and UI proposals to API integration, testing, deployment, and production support.
- Built and integrated RESTful APIs using Node.js, Next.js, Express.js, and TypeScript, and developed data-intensive interfaces for internal and admin systems.
- Developed Cypress end-to-end tests across 27 websites in 5 languages to prevent regressions and validate production readiness.
- Leveraged GitHub Copilot and AI coding agents for agentic development, code reviews, and code generation while maintaining codebase standards and consistency with designs.

Flowerstore Group **Makati City**
Web Developer Intern Sept 2022 – Dec 2022

- Led the UI design for the mobile app and blog feature using Figma, creating polished mockups, reusable components, and a custom loading animation that was implemented in production.
- Worked closely with the tech team to fix backend bugs in Laravel (PHP) and assist with daily dev tasks across frontend, databases and backend.
- Developed the blog page frontend using Vue.js and Tailwind, translating designs directly into responsive, production-ready code.

FEU Institute of Technology **Manila**
Junior System Developer and UI/UX Designer Intern May 2022 – July 2022

- Digitized manual workflows by turning paper-heavy processes into a streamlined web-based system, reducing paperwork and improving operational efficiency.
- Led the UI design and collaborated on the development of internal tools from the ground up. Created mockups in Figma due to the absence of design assets, then built responsive interfaces using Bootstrap and jQuery.

TECHNOLOGY STACK

Frameworks: Next.js , React JS, Bootstrap, ShadCN, Cypress, Tailwind, AG-Grid, React Query, Redis, Node.js
Tools: Git Desktop, HTML/CSS, Figma, Copilot
Languages: Javascript, Typescript
Certificates: MTA: Database Fundamentals (Microsoft), IT Specialist - JavaScript - (Certiport)
